

This compact machine fits on a desk, has low operating costs, strong wireless connectivity, and is ideal for small businesses worldwide. Read this post to understand why this machine is perfect for your immediate needs.

The Xerox Phaser 3330/DNI prints extraordinarily fast at 42 ppm, and is a competent entry in Xerox's latest black and white line-up. Its fast first-print-out time is 6.5 seconds, and its duty cycle is 80000 pages per month. These features make it ideal for small government and business departments and offices that do not require colour or large volumes of paper.

Read our guide to understand more about this machine's capabilities and who has used it recently.

A work-centre for small businesses

If you are expecting high print quality, then you have come to the right place. The Xerox Phaser 3330 has a maximum print resolution of 1200 dpi x 1200 dpi.

The Xerox Phaser 330 includes standard connectivity features such as USB, Ethernet, and WiFi. It also enables mobile printing by way of Apple AirPrint, Google Cloud Print, Mopria, and Xerox Print Service Plug-in for Android devices.

For small businesses with low printing requirements, this machine does its job admirably. Its capacity begins with a 250-sheet tray and a 150-sheet bypass that accepts up to 8.5" x 14" paper. You can add an optional 550-sheet tray as well for your growing business needs.

If you want to ensure security, the Phaser 3330 includes features such as IPSec, IP Filtering, and secure print.

Upgrade with THREE aftermarket print cartridges

Investing in a printer or copier is a big deal for small businesses, especially when purchasing it internationally or importing it. The Xerox Phaser 3330 offers a long-term solution in the form of three aftermarket print cartridge upgrades that contribute to low operating costs. Here are the three upgrades:

- Standard capacity (2600-page yield)
- High-capacity (8500-page yield)
- Extra-high capacity (15000-page yield)

If you choose to upgrade to the high-capacity and extra-high-capacity cartridges, the price comes down to around 2 cents per page, which is an affordable operating cost for a small business or office.

These cartridges are extremely useful for legal printing.

Who has used this machine recently?

Recently, CAD Reprographics LLC sold ten Xerox Phaser 3330 machines to a successful IT company in Iran. The IT company was able to ship the machine over easily due to its small size. The machine's compactness and small footprint was perfect to fulfil their business needs.
